

CHIRK CASTLE CHIRK, NORTH WALES

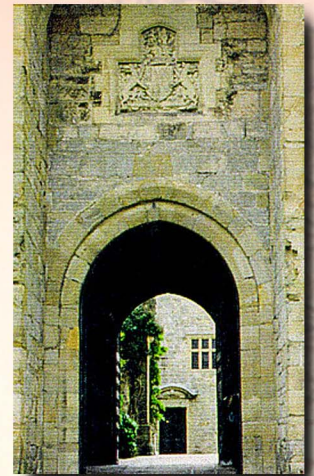

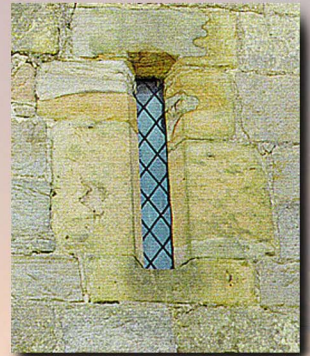

PROJECT DESCRIPTION

TACP have been working at the castle since 1981 on a rolling programme of extensive capital structural repairs, and conservation of decorative plaster fabric, statues and their settings, metal work, general maintenance and the co-ordination of specialists and archaeologists.

Budget costing for funding was an integral part of the project management service with the major capital repairs funded by CADW.

Not only have we been responsible for the management of repairs at the Castle, we have also been associated with the vernacular buildings that form the complex of the castle estate.

One of the recent projects has been to convert a part of the home farm building into a new reception/ticket office and public toilets. Associated with this was the construction of a new park.

Job no: 4704
Project Sheet no: 011

KEY DETAILS

CLIENT: The National Trust
Location: Chirk, North Wales
Sector: Conservation
Construction Value: Undisclosed
