

SPORTS FACILITY & ELITE JUDO CENTRE UNIVERSITY OF WOLVERHAMPTON

PROJECT DESCRIPTION

The new sports and elite judo training centre at the Walsall Campus provides unique facilities to support international level judo players whilst satisfying the educational needs of the University.

The project incorporates a 12-court sports hall designed to Sport England requirements, which can be used as three separate arenas. Separate conditioning and training rooms are provided, along with all ancillary accommodation. The project forms the impetus for the Walsall Campus masterplan and includes a new campus road system. A new full size synthetic pitch and new athletics facilities, including 400m training track and remote throw facilities, have been provided. The existing grass pitches have also been re-layed.

With supporting funding from Sport England, the project delivers state-of-the-art facilities within a sensible budget.
