

# CITIBANK FINANCIAL CENTRE - 'SMART BANKING' GLOBAL

## PROJECT DESCRIPTION

TACP have been working with Citigroup for over 10 years, assisting with the roll-out of the Retail Banking global design specifications for their branches globally, including new-builds, relocations and refurbishments. TACP serve as global on-call Architects and Designers for Global Citibank Realty Services (CRS). TACP are responsible for delivering branch concept designs for branches all over the world (Stage 1); checking all construction drawings against the Global Specification Guide prior to construction (Stage 2), and site visits as and when necessary. TACP are also responsible for updating and issuing the Citibank Global Specification Guide, and contribute to the ongoing evolution of Citibank's branch design, as well as undertaking detailed branch designs and construction drawings when requested to do so by the local CRS's. TACP have recently completed two branches in Dubai, and have been involved with branch design and construction in Europe, the Middle East, Africa, Asia Pacific, the United States and Latin America.

The Smart Banking experience is aimed at the high street customer market, and draws heavily on quality materials and the latest banking technology.

Job no: 11046  
Project Sheet no: 0028
