

# PRIVATE HOUSE BANGOR ON DEE

## PROJECT DESCRIPTION

TACP provided full architectural services for the design and construction of a private country property which replaced an existing dwelling. The front part of the dwelling replicates the original property, which was structurally unsound. The property has been raised above the river Dee flood level and benefits from a ground source heat pump.

The central living space is sub-divided by a wood burner, with an orangery that overlooks the gardens. The feature staircase leads to a balcony landing which, in turn, leads to the five bedrooms. The property stands within extensive grounds with garages, stables and a subsequently added swimming pool.

Job no: 5754  
Project Sheet no: 045

## KEY DETAILS

**CLIENT:** Private Client, details withheld

**Location:** Bangor on Dee, North Wales

**Sector:** Residential

**Construction Value:** Undisclosed
