

# QUADRENNIAL SURVEYS

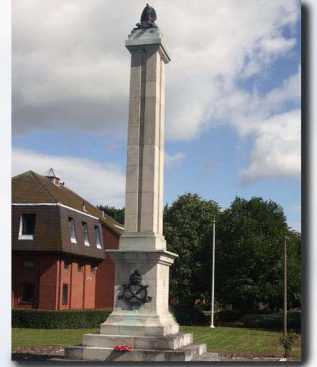

## MOD Bases

### QUADRENNIAL SURVEYS

TACP Architects have completed a number of quadrennial surveys on listed buildings, structures and scheduled monuments on various MOD Bases throughout the country on behalf of Carillion Enterprise.

These in-depth surveys involve visual inspections of the external fabric, internal finishes and fittings and the surrounding environs and a full report is prepared which outlines defects and provides an action plan on the priority of the necessary repairs. Each defect is photographed and listed in order of priority.

The structures surveyed include war memorials, grade 2 listed churches, listed boundary structures, grade 2 listed cruck-framed barns and one of the largest original barrack blocks in the country.

Job no: Various  
Project Sheet no: 065
