

MOEL FAMAU JUBILEE TOWER NR. CILCAIN, NORTH WALES

PROJECT DESCRIPTION

Denbighshire County Council in partnership with Flintshire County Council acquired funding from the Heritage Lottery Fund to improve access and consolidate the Jubilee Tower on the summit of Moel Famau, located at the heart of the Clwydian Range AONB.

TACP Architects prepared a comprehensive report including historic analysis and statements, condition survey and options to consolidate and improve the structure. The report forms a central document within a framework to secure funding to carry out works to preserve this fragile structure. Options for the improvement varied from simple restoration of the tower and improvement of existing steps, to the total rebuild of the tower to its original design, as built in the early 1800's.

The chosen option included consolidation and repointing of existing stonework, removal of vegetation and lowering of ground level around three of the bastions. The fourth bastion was partially rebuilt and the ground surrounding lowered to the original level, restoring it to its original form. Inside of the cylindrically hollow bastion, we designed and built a circular staircase to provide improved access to the top of the tower, including a platform area within the bastion.

Job no: 12010
Project Sheet no: 084

KEY DETAILS

CLIENT: Denbighshire County Council
Location: Clwydian Range AONB, Nr. Cilcain
Sector: Conservation & Leisure
Construction Value: £150,000

Pembroke House, Ellice Way
