

CEMETERY LODGE RUABON

PROJECT DESCRIPTION

Cemetery Lodge, Ruabon is an important historic building, acting as a gateway to the large hilltop graveyard. The property is stone built with a large archway incorporating a traditional lych-gate and an oak trussed slated roof. The gateway building includes an attached dwelling which has had a second storey extension.

TACP Architects were originally commissioned to undertake a detailed condition survey of the historic property within the Ruabon Conservation Area. The building was generally in poor condition and has been unsympathetically repaired. TACP Architects' commission was expanded to provide a scope of works and specification for the extensive repair and refurbishment works to restore the property.

Job no: 11053
